TBA is available. As HVAC engineers and commissioning agents with healthcare experience, we can help Ohio hospitals adjust air balance needs in a crisis.

We are networked with and monitoring the availability of

- 1 HVAC contractors and Testing, Adjusting and Balancing contractors to be our “boots on the ground”,
- 2 ASHRAE National and local chapters for the latest means, methods and technical information
- 3 Local warehousing and suppliers of ventilation, filtration, UV treatment and filtration equipment.

Sara Bayramzadeh, the coordinator of the Healthcare Design program at Kent State University. I am an architectural design, researcher, and educator in healthcare design.

Scheeser Buckley Mayfield has always emphasized hospital and healthcare engineering and remains available for any needs that might arise in our community. We have been fielding more and more calls over the last week and will prioritize responses and workload using the governor's list of critical infrastructure as a guide.

We (Building Integrated Services - BIS) are a design-build HVAC engineering company here in Oakwood that specializes in air balancing in complex locations (hospitals, labs, heavy industrial, commercial, etc) amongst other disciplines. Can you add us to the list please?

Thanks!

Tony Clark, P.E.

HEAPY

Healthcare Practice Director

www.heapy.com

HEAPY is an MEP engineering firm that has a practice dedicated to healthcare design. We have 60 dedicated staff throughout Ohio and Indiana that specialize in designing and commissioning building systems for healthcare and an overall workforce of over 225. We received notice about desiring to get a list of consultants as a resource for healthcare facilities and would offer that we are willing to help any healthcare system that needs it.
